CG 509

Great quality in a small volume.

You will be amazed by the quality of these speaker's performance, but most of all by their size.

The CG 509 are 2-way diffusers of about 9 litres. The cabinet, realized in birch wood Multipanel System, measures only 24cm on each side, and it will be easy for you to place it in any room.

Even though CG 509 is small, you will not have to renounce quality. Your Reference 509 will present a musical performance extremely linear and faithful.

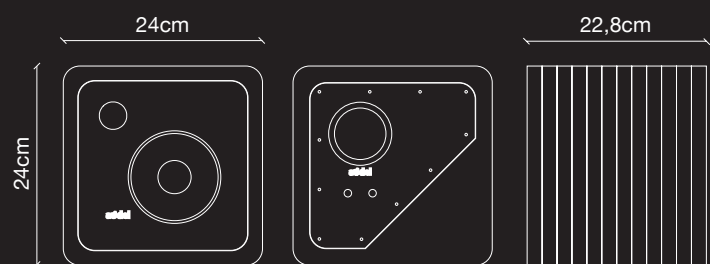

This diffuser consists of a 5" midwoofer with cone in paper treated with wood filaments, and a fine neodymium tweeter with a 27mm dome.
